

# Abhinav Mehta

Full Stack / AI Engineering Intern

✉ [abhinavmehta374@gmail.com](mailto:abhinavmehta374@gmail.com) [in](#) [LinkedIn](#) [GitHub](#) [Portfolio](#) ☎ +91 7559205462

## Summary

Final year CS undergraduate with hands-on industry experience in AI/ML systems, full-stack development, and IIoT. Built an IEEE-published transformer-based recommendation engine, an LLM-powered CI/CD auto-remediation tool, and production IoT pipelines. Seeking SDE or AI/ML intern roles.

## Education

Vishwakarma Institute of Information Technology (VIIT), Pune

CGPA: 8.49 / 10

B.Tech - Computer Science (*IoT, Cyber Security and Blockchain Technology*)

2023 – 2027

## Technical Skills

- **Languages:** Python, JavaScript, C++17, SQL
- **AI / ML:** Transformers, BERT Embeddings, TensorFlow, Scikit-learn, CNNs, LSTMs, FAISS / ANN, Ollama (Mistral)
- **Web & Backend:** React, Node.js, FastAPI, Socket.io, REST APIs, Tailwind CSS, Three.js, Sanity CMS
- **Databases:** PostgreSQL, MongoDB
- **DevOps / Tools:** Docker, Docker Compose, GitHub Actions, CI/CD, Grafana, Cloudflare CDN, Linux, Git, Postman
- **Other:** Solidity / Smart Contracts, Sensor Integration

## Work Experience

Industry Project Intern — Two Registers Pvt. Ltd.

January 2026 – April 2026

- Developed an IIoT-based gauging and monitoring system integrating 4+ sensor modules with real-time data acquisition dashboards and live factory-floor alerting.

Web Developer (Contract) — LSOM Community

December 2025 – January 2026

- Built and delivered a production community platform for 1000+ members, featuring event management and content workflows powered by **Sanity CMS**; managed domain and DNS configuration through **Cloudflare**. Live at [lsom.in](https://lsom.in).

Industry Project Intern — Yantrikisoft Pvt. Ltd.

July 2025 – November 2025

- Engineered a low-latency job recommendation engine using **BERT + FAISS-backed ANN**, cutting search query time to **under 50ms** on a **100K+ job corpus** and improving top-5 precision by **~30%**.
- Co-authored IEEE-published paper: *Real-Time Job Recommendation Using Transformer Embeddings and Vector Similarity Matching*.

Industry Project Intern — Two Registers Pvt. Ltd.

July 2025 – November 2025

- Developed an end-to-end anomaly detection pipeline for IoT manufacturing data using **Isolation Forest, One-Class SVM, and LSTM** models, targeting rare faults in a heavily imbalanced (<1% **positive rate**) dataset.
- Architected real-time alert workflows on live industrial IoT data streams, reducing mean time to fault detection by integrating model outputs directly into the monitoring dashboard.

## Projects

PipOtter - AI-Powered CI/CD Pipeline Orchestrator

[GitHub](#)

- Built an automated remediation workflow that processes **GitHub Actions webhooks**, uses **Mistral via Ollama** to diagnose failures, and routes outcomes to fixes, retries, or email alerts.
- Automated **GitHub PR creation** for dependency errors and containerised services with **Docker Compose**. *Tech: Python, FastAPI, PostgreSQL, Docker*

Parkinson's Detection via CNN on MRI Scans

Accepted - IET SCS 2025, Bahrain

- Developed a custom **CNN pipeline** for Parkinson's detection from MRI scans, using data augmentation to address class imbalance and improve model generalisation.
- Research accepted at the **IET Smart Cities Symposium 2025**. *Tech: Python, TensorFlow, Scikit-learn*

Typix - Real-Time Multiplayer Typing Game

[Live Demo](#)

- Built **WebSocket-based matchmaking** with synchronized race state and live scoring across concurrent multiplayer sessions.
- Implemented event-driven room management and real-time client-server communication. *Tech: React, Node.js, Socket.io*

## Certifications

- **Oracle:** Generative AI Professional; AI Foundations Associate    **Postman:** API Student Expert
- **Cisco:** CCNA (Networking, Routing & Switching, Wireless, Cybersecurity Essentials)

## Achievements & Leadership

- Crafted CTF challenges for **VISWACTF'24** — attracted **3000+ teams** from **100+ countries**.
- Coached and led a **7-member cybersecurity team** to **Top 25 All India Rank** in competitive CTF.
- Solved **100+ algorithmic problems** on Codeforces and CodeChef.
